

For the commission:

We are very concerned about changes...proposed and existing under the DeJoy administration...that are impacting our mail service. Specifically, the slowdown in service and the proposed closing of US post offices throughout our country are of grave concern. We are avid supporters of the USPS and our postal workers. Local post offices and their services are essential to our communities. Please consider your postal customers' concerns prior to taking action to broadly impact us.

Sincerely,

Tim and Becky Schroer
